Report for Q2 2024

Highlights

- Order intake was SEK 18.9 (18.4) billion, an organic increase of 4 percent.
- Net sales was SEK 17.5 (15.9) billion, an organic increase of 11 percent.
- Adjusted EBITA increased by 23 percent to SEK 2.9 (2.4) billion, corresponding to a margin of 16.7 (15.0) percent.
- Strong cash flow from operating activities of SEK 2.6 (1.3) billion.
- Earnings per share of SEK 4.08 (3.63).

* Organic change. ** Alternative performance measures. *** Nebt debt including lease liabilities.

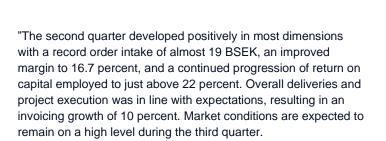

The totals in the tables and calculations do not always add up due to rounding differences on individual lines. Meaning each subtotal or line figure corresponds with its original source and rounding, which can result in differences with reported totals which aggregate the exact figures before rounding.

Comment from Tom Erixon President and CEO

Outlook for the third quarter

"We expect demand in the third quarter to be on a somewhat lower level compared to the second quarter."

Earlier published outlook (April 25, 2024): "We expect demand in the second quarter to be somewhat higher than in the first quarter."

The Marine division had another strong order intake quarter with a growth of 30 percent, driven by high demand in the ship contracting market. The order book in the division now stands at 23 BSEK, not so long ago the normal level for the entire group. The recovery from the margin pressure during late 2022 and first half of 2023 is now completed, and the order book supports a stable development well into 2025.

The Energy division had a relatively stable quarter in the context of the weakness in the HVAC market, but orders still declined 12 percent compared to the same quarter last year. The order decline in HVAC applications have to some degree been offset by progress in other applications and service. The next quarter is expected to be the bottom of this cycle for the division even if the heat pump market may take a bit longer to recover. Margin improvement in several areas largely compensated for the low utilization effects in the HVAC segment. The margin decreased from the elevated level in 2023 mainly related to non-recurring revaluation effects.

The business environment in the Food & Water division was mixed, with a continued improvement in the transactional part of the portfolio, especially in the important distributor channel. The large project order intake was lower as expected, following the elevated order intake of Desmet last year. In all, order intake decreased 10 percent. Investment decisions for large projects

were slow in some areas, most notably in the US. Invoicing recovered well after the weaker first quarter and grew 10 percent on the back of a solid order book and improved short-cycle demand. As expected, the margin recovered with increased volumes and in all a well-executed quarter.

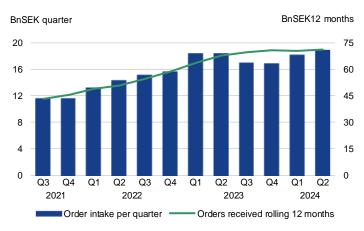

Alfa Laval's sustainability agenda is broad and progressed well in the quarter. The safety at work improved further in the quarter and the lost time injury frequency rate was at 2.2, somewhat above the ambition level for the year. The carbon intensity in scope 1 and 2 is constantly reduced with the ambition to be carbon neutral in 2030. In addition to energy efficiency measures the investment program to replace gas in our operations are clarified and included in the medium-term capex plan. In the scope 3 area the sourcing program for carbon-neutral metals is progressing with an expected ramp-up period starting in 2026-27.

Alfa Laval, together with many technology-driven companies, is investing in our own climate footprint as well as in the technology required to drive the energy transition. Today the technology platforms for electrification, hydrogen, carbon capture, and new fuels are ready and supported by strong industrial cluster, often working together to accelerate needed solutions. Still, the pace of the global energy transition is lacking the needed momentum at this moment. Short-term focus on energy efficiency can partly compensate for a longer transition phase, but it can never solve the whole climate challenge."

Tom Erixon, President and CEO

Financial overview

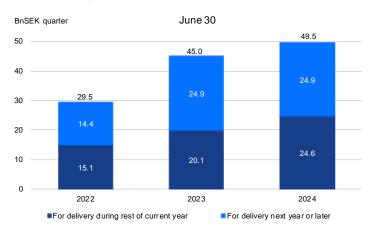

Order intake

Orders received was SEK 18,916 (18,405) million in the second quarter and SEK 37,189 (36,790) million in the first six months 2024.

Orders received from Service constituted 27.1 (27.8) percent of the Group's total orders received during the second quarter and 28.3 (27.5) percent during the first six months 2024.

Order backlog

Excluding currency effects and adjusted for acquisition and divestment of businesses the order backlog was 11.2 percent higher than the order backlog at June 30, 2023 and 10.6 percent higher than the order backlog at the end of 2023.

Net sales

Net invoicing was SEK 17.530 (15,880) million for the second quarter and SEK 32.435 (29,991) million for the first six months 2024.

Net invoicing relating to Service constituted 29.3 (30.1) percent of the Group's total net invoicing in the second quarter and 30.0 (30.7) percent in the first six months 2024.

Organic: Change excluding acquisition/divestment of businesses. Structural: Acquisition/divestment of businesses. Service: Parts and service.

* Alternative performance measures. ** Excluding comparison distortion items.

Quarter on guarter invoicing increased with 10.4 percent and sequentially with 17.6 percent, adding an additional SEK 554 million to the Adjusted EBITA result. Food & Water recovered a good part of the sales volume that was deferred from the first quarter and Marine has stepped up its invoicing of the accumulated order backlog. Service revenues were 7 percent up on last year and accounted for 29 (30) percent of the total invoicing which from a mix perspective had only a nominally dilutive impact compared to last year. Revenues in large project business had an important impact on the revenue mix and a positive contribution to profitability. Current backlog supports a continued similar revenue mix and remains in phase with current commodity and production input prices. The aggregated result on the adjusted gross margin is an increase of 0.6 percentage points to 34.5 percent. Expenses in relation to revenues decreased with 1.1 percentage points, down to 15.4 percent for the Group. Some imbalances between actual demand and manufacturing capacity remain, although well under control and addressed in accordance with future demand expectations. Adjusted EBITA increased with 23 percent to SEK 2,932 million in the quarter.

Sales and administration expenses were SEK 2,592 (2,342) million during the second quarter and SEK 5,049 (4,521) million during the first six months 2024. The figures for the first six months corresponded to 15.5 (15.1) percent of net sales. Sales and administration expenses increased by 10.7 percent during the second quarter and by 11.7 percent during the first six months 2024 compared to the corresponding periods last year.

The costs for research and development during the first six months of 2024 corresponded to 2.5 (2.6) percent of net sales. The costs for research and development decreased with 1.4 percent during the second quarter and increased by 3.7 percent during the first six months 2024 compared to the corresponding period last year.

Income bridge

| SEK millions | Q2 | Jan-Jun |
|---------------------|-------|---------|
| Adjusted EBITA 2023 | 2,378 | 4,765 |
| Volume | 588 | 932 |
| Mix | 97 | 143 |
| Costs | -119 | -418 |
| Currency | -12 | -55 |
| Adjusted EBITA 2024 | 2,932 | 5,367 |

Net sales

Adjusted EBITA

Earnings per share in the quarter amounted to SEK 4.08 (3.63) and 8.15 (7.27) for the first six months 2024. The corresponding figure excluding amortisation of step-up values and the corresponding tax, was SEK 8.95 (8.19) for the first six months.

Consolidated financial net

| | Q | 2 | Jan- | Jun | Jan-Dec | Last 12 |
|--|------|------|------|------|---------|---------|
| SEK millions | 2024 | 2023 | 2024 | 2023 | 2023 | months |
| Financial net | -352 | -133 | -300 | -231 | -606 | -675 |
| Net of interests | -82 | -84 | -149 | -148 | -350 | -351 |
| of which interest expense on loans | -68 | -75 | -136 | -129 | -295 | -302 |
| Dividends and other financial income | 3 | 7 | 7 | 8 | 13 | 12 |
| Net of exchange rate differences | -273 | -55 | -158 | -91 | -269 | -336 |

Taxes

The tax on the result after financial items was SEK -694 (-488) million in the second quarter and SEK -1,251 (-1,021) million in the first six months 2024. The tax rate was 27 percent for the Group in the first six months which is above the guidance range of 24-26 percent driven by more aggressive tax audits by local tax authorities in some jurisdictions which affect the normal rate with one off settlements.

Cash flow

Continued good cash conversion in the quarter resulted in a SEK 2,633 (1,342) million operating cash flow and SEK 4,383 (2,346) million in the first six months.

Depreciation, excluding allocated step-up values, was SEK 416 (384) million in the quarter and SEK 834 (727) million during the first six months 2024.

Acquisition of businesses and release of acquisition related withheld amounts during the first six months 2024 amounted to SEK -50 (-100) million of which SEK -2 (-14) million is related to this quarter.

Financing activities affecting cash flow were substantial in the quarter with the payment of dividend to our shareholders with SEK 3,100 million, repayment at maturity of a corporate bond of EUR 300 million, and short-term financing to bridge short term liquidity of SEK 1,600 million which is expected to be completely repaid before year end. Total cash flow in the second quarter was SEK -2,716 (-1,510) million with a balance of cash and cash equivalents at the end of the quarter of SEK 3,766 (3,467) million.

*Sequential change between Q1 2024 and Q2 2024.

Energy Separation

Order intake*

The Energy Division reported a lower order intake compared to the same quarter last year. Demand remained strong in data centres as the industry is adopting more energy efficient cooling solutions and service continued to show a positive development. However, this could not fully compensate for a weaker base business and project delays, especially in cleantech, due to increased project costs as a result of inflation and higher interest rates.

HVAC** order intake declined due to lower sales of heat pumps and inventory adjustments by key customers, following policy changes in the European energy market. Other segments of the HVAC industry continued to face low demand due to continued uncertainty in the construction sector. Refrigeration was stable compared to the same quarter last year. Orders increased in light industry & tech, driven by high demand in the data centre and semi-conductor industries. Order intake declined in process industry, mainly in pulp & paper, chemicals and petrochemicals. The transition to net zero drives investments in mining of many minerals, supporting growth in the quarter, with water treatment in mining also developing positively. After a number of quarters of growth, order intake in oil and gas and refinery decreased compared to the same quarter last year. Middle East, India and China remained strong, but demand slowed down in the US. The Americas, India and Middle East reported strong order intake, with good activity levels in most industries. Order intake in Europe and rest of Asia declined, reflecting the continued low activity level in the construction industry and project delays in the cleantech business areas.

Service demand was on par with last year, with a positive development in most geographical areas

Net sales*

Most markets showed a positive development in sales both in service and capital sales. The exception was HVAC, which had lower deliveries to Heat pump manufacturers. The mix is slightly negative with a higher share of project sales.

Adjusted EBITA***

Increased sales activities, OPEX cost related to investment, and inflationary pressure resulted in increasing overhead cost compared to last year. Currency has a small negative impact on the overall result.

* Comments excluding currency effects.

** Heating, Ventilation & Air Conditioning.

*** Comments relating to income bridge.

*Sequential change between Q1 2024 and Q2 2024.

Order intake*

Orders declined compared to the same quarter last year. This is primarily explained by lower order intake for Desmet. Geographically, the US, Latin America and Asia contracted. The latter however showed a mixed picture with lower demand in South-East Asia and India, with China slightly recovering.

Order intake for oils and fats declined due to lower demand for traditional applications. Demand remained strong for HVO (Hydrotreated Vegetable Oil), most of which for the European market. Protein grew, with contribution from large orders in both Southern and Eastern Europe. Dairy grew, showing real strength in Europe and even more so in Asia, but with a decline in both Latin and North America. Orders in pharma and biotech grew, mainly in North America and Asia and then in particular China. Europe also reported growth. After over a year of saturation post the strong pandemic years, the sector has seen a certain uptick in global investments. Ethanol orders were lower compared to last year, with less large orders. The driver for the sector, a continued strong biofuel demand from higher blending requirements in countries like USA, Brazil and India, however remains. Water and waste declined somewhat with both the large North American market and Europe being down, while Asia continuing to show positive development. The size and timing of when public funds for water investments are made available, determines investments in the industry. Brewery order intake was down compared to last year with few capacity related investments in a consolidating industry. However, replacements, process and yield improving products and solutions continue at a stable pace.

Service contracted after last year's record levels. Activity was clearly higher in pharma and protein, whereas remaining sectors declined. Geographically, Europe and Asia were stable but North America declined.

Net sales*

Net sales grew at a strong pace. After some delays in invoicing in the beginning of the year revenue recognition picked-up in the project business with an increased execution and delivery pace of equipment from a strong order backlog. Geographically, sales developed strongly in North America and Asia, not least in China, whereas Europe as a whole recorded a more or less unchanged level.

Adjusted EBITA**

Adjusted EBITA increased compared to last year, benefitting from strong growth in sales in the transactional as well as in the project business. Mix impact was marginally negative from revenue recognition of larger projects, however with the balance of sales delivering a solid gross margin. Costs were up in the quarter, driven both by inflation and increased activity levels. The net effect of these factors, combined with an immaterial currency impact in the quarter, increased the Adjusted EBITA compared to last year.

*Sequential change between Q1 2024 and Q2 2024.

Order intake*

Order intake for the Marine Division was significantly higher compared to the same quarter last year. A continued high demand for marine pumping systems, digital solutions and service more than offset the lower demand levels in offshore, ballast systems and gas systems.

The underlying market sentiment related to the building of new vessels was on a higher level compared to the same period last year. New contracting has been driven primarily by tankers and gas carriers, with a softer start in the container and bulk carrier segments. In addition, the first large cruise ships have been ordered after three-years of low activity post covid. The increased shipbuilding activity has been further supplemented by a continued growing demand for sustainability related solutions which mitigate CO² emissions, including solutions around energy efficiency, low carbon and zero carbon fuels. Demand for ballast water treatment systems has, as expected, eased further as fewer number of vessels remain to be retrofitted before the approaching 2024 regulatory deadline and the addressable market gets more correlated to new vessels being contracted. Multi-fuel capable solutions continue to gain traction, driving demand for the new generation of multi-fuel boilers and alternative fuel supply systems. Offshore orders were at a significantly lower level compared to the same quarter last year as a number of project commencement decisions have been deferred due to constrained supply chains. The underlying market sentiment in this area however remains strong due to stable high oil prices and investments in new projects to safeguard long term energy security.

Service orders grew compared to the same quarter last year. Demand was driven by a good activity level in shipping and due to a growing installed base. Good freight rates in almost all vessel segments and the consequent desire to keep vessel assets in good operational readiness resulted in increased on-board maintenance and higher demand for all service scopes, ranging from spare parts to service.

Net sales*

Net sales were at a higher level than the same quarter last year. Sales were higher for both capital sales and service in almost all product areas except ballast water systems and gas systems.

Adjusted EBITA**

The increased net sales in the quarter had a positive volume effect. The product mix and the good development of capital sales positively influenced the net mix effect. The factory and engineering result was positive due to higher utilization rates. The cost level was higher than last year due to inflationary pressure and a higher activity level.

| Total | 17,530 | 15,880 | 32,435 | 29,991 | 63,598 | 66,042 |

* The split of own products within separation, heat transfer and fluid handling is a reflection of the current three main technologies. Marine environmental is a growing new product area basically outside the main technologies. Other is own products outside these four product areas. Associated products are mainly purchased products that compliment Alfa Laval's product offering. Services cover all sorts of service and service agreements excluding spare parts.

Information about major customers

Alfa Laval does not have any customer that accounts for 10 percent or more of net sales. Tetra Pak within the Tetra Laval

Group is Alfa Laval's single largest customer with a volume representing approximately 5 percent of net sales.

Sustainability

Case studies

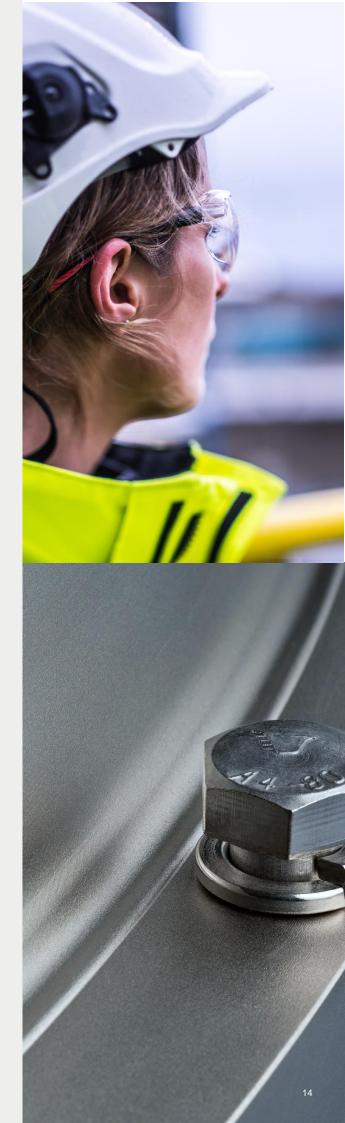

Safety stand-downs to reduce workplace injuries

In response to not reaching the goal of reducing workplace injuries last year, a plan was developed to further improve safety culture and behaviors.

An example from last quarter's initiatives is safety stand-downs in the factories. For one full day production was halted in 16 of our factories to focus on risk identification, safe behavior and sharing of learnings regarding safety. In each of the 16 factories this has resulted in local plans with clear commitments and responsibilities going forward. The initiative will continue on more sites.

Recycling of metals at end of life of products

Taking responsibility for the total product lifecycle is a key to increase circularity and reduce carbon emissions. For heat exchangers, disc-stack centrifuges and decanter separators at end of life, the existing agreement with Stena Recycling for the recycling of metals from customers in the Nordic countries has been extended. Together with our partner Aperam, we will enable the recycling of metals from disc-stack centrifuges at the end of the product lifetime, from customers around the world. The expansion is stepwise, starting in Europe in 2024 with a plan to expand the offer to customers globally.

Quarterly follow up

- Total energy consumption is down both sequentially and compared to the same quarter last year.
- Reduction of carbon emissions is progressing well aligned with targets.
- Number of Lost Time Injuries up but positive development in the Lost Time Injury Frequency Rate.

Energy

The positive trend in the energy consumption continues, with the total consumption down both sequentially and comparing to the same quarter last year. The reduction is mainly due to the targeted work with energy efficiency at the company sites.

Carbon emissions

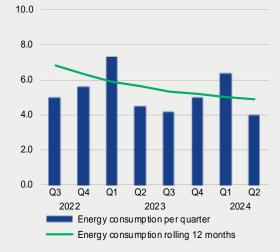

Carbon emissions in scope 1 and scope 2 decreased slightly compared to last quarter. Contributing factors are the ongoing phase out of fuel oil and Liquified Petroleum Gases (LPG). There is also a lower consumption of district heating, contributing to lower emissions in the Nordics. The conversion into renewable sources of electricity continue and is contributing to lower Scope 2 emissions.

Health and safety

Despite that the Lost Time Injuries increased slightly in the quarter compared to last, the Lost Time Injury Frequency Rate (last twelve months) continues to improve due to that the number of working hours increased in the quarter. The most severe incident during the quarter involved an employee who seriously injured his fingertip, while inspecting a valve at a customer site. Remaining Lost Time injuries during the quarter are mainly related to slips, trips and falls but also a few injuries while handling tools, equipment and components.

Energy: consumption in relation to turnover

MWh per Million SEK in invoicing

LTIFR = Number of lost time injuries in time period * 1,000,000 / Worked hours in the period

New products during the second quarter

During the second quarter Alfa Laval has introduced among others the following new products that help our customers to become more energy efficient, reduce their carbon footprint and improve their processes:

1. Alfa Laval PureBallast 3 Ultra

As most of the vessels in the world merchant fleet have now been equipped with ballast water management systems (BWMS), the market needs are lower and many BWMS manufacturers have withdrawn or face an uncertain future. Alfa Laval, by contrast, continues to evolve its leading UV technology and its offering to shipowners and shipyards. PureBallast 3 Ultra answers the needs of today's ballast water management market – and also tomorrow's. Compact and easy to install, the automated inline treatment solution offers unmatched performance in challenging waters with enhanced UV technology and improved filter performance at low power consumption. It is connectivity-ready and designed for a vessel lifetime.

2. Framo Submerged Liquefied Gas pump

As pioneers and leaders in marine pumping systems, Framo continues to set the benchmark for performance and reliability. Leveraging five decades of invaluable pumping expertise, the Framo Submerged Liquefied Gas pump is a fully submerged centrifugal pump meticulously designed for LNG applications.

With a fail-safe design ensuring reliable fuel supply and cargo discharge, the Framo SLG pump sets a new standard in marine pumping technology, reinforcing our commitment to driving efficiency and sustainability in the maritime industry

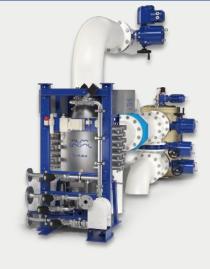

3. Alfa Laval Hygienic line H5 gasketed plate heat exchanger

The newest addition to the Alfa Laval Hygienic Line is the Alfa Laval H5. Like other plate heat exchangers in the company's premium range, it optimizes process hygiene and energy efficiency. It is designed specifically for small to medium hygienic processing lines across the dairy, brewery, beverage, and pharmaceutical industries. With its unique hygienic design and high thermal efficiency, the Alfa Laval H5 enables manufacturers to transfer energy more efficiently using less water, steel, and cleaning-in-place. This maximizes product safety, uptime and energy efficiency while reducing the environmental footprint of hygienic applications in food and pharmaceutical manufacturing.

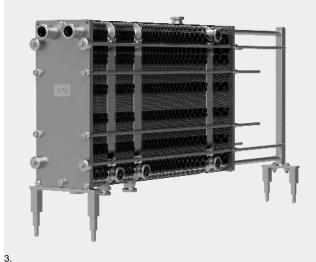

4. Alfa Laval SE 43 brazed plate heat exchanger

Alfa Laval SE brazed plate heat exchangers provide efficient heat transfer with a small footprint. They are specifically designed to work as evaporators and condensers in applications such as chillers and heat pumps. The Alfa Laval SE product line is thermally optimized for propane. It offers design and technical features specifically with safety in mind.

Benefits: • Compact • Easy to install • Self-cleaning • Low level of service and maintenance required • All units are pressure and leak tested • Gasket free

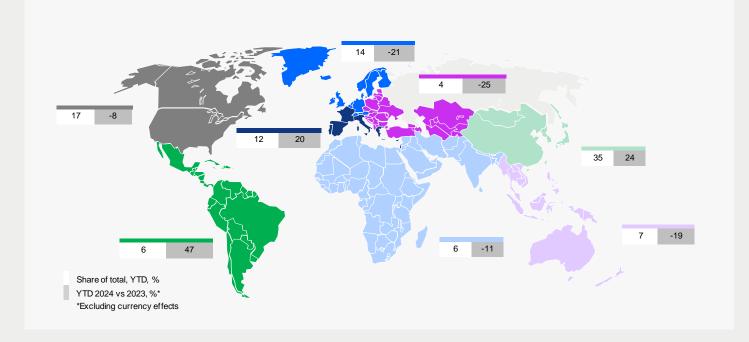

Order intake by region

Northern Europe

The region reported a declining order intake compared to the same quarter last year, mainly due to the decline in HVAC and offshore. Energy had strong demand in oil & gas and refinery. Food & Water grew driven by oils & fats and prepared food & beverage. Marine reported a strong underlying demand in shipping. Service was at the same level as last year in all three divisions.

Central and Eastern Europe

The order intake in the region decreased compared to the same quarter last year, mainly due to the decline in HVAC. Energy had strong demand in tech. Food & Water grew driven by protein and prepared food & beverages. Marine noted a weaker demand in shipbuilding and shipping. Service reported growth in Marine.

Southern Europe

The order intake in the region grew double-digit compared to the same quarter last year. Energy reported strong demand in process industry. Food & Water grew driven by oils & fats and protein. Marine reported strong demand in shipping. Service grew in all three divisions.

North America

The region reported a declining order intake compared to the same quarter last year, mainly due to a weaker demand in oils & fats. Energy grew driven by tech and clean fuels & chemicals. Food & Water had a strong underlying demand in prepared food & beverage and dairy. Marine reported growth in shipbuilding and shipping. Service grew in Energy and Marine.

Latin America

The region reported a declining order intake compared to the same quarter last year. Energy grew driven by oil & gas. Food & Water had a strong underlying demand in prepared food & beverage and dairy. Marine grew driven by oil & gas. Service reported growth in all three divisions.

Northeast Asia

The order intake in the region grew double-digit compared to the same quarter last year. Energy reported a strong underlying demand in manufacturing and tech. Food & Water grew driven by pharma and dairy. Marine grew driven by shipbuilding. Service grew in Food & Water and Energy.

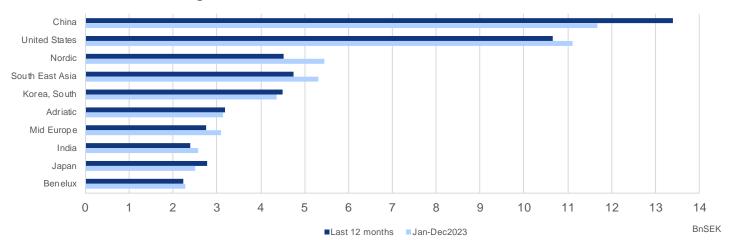

Southeast Asia and Oceania

The order intake in the region decreased compared to the same quarter last year. Energy reported strong underlying demand in tech and mining. Food & Water reported strong underlying demand in prepared food & beverage and dairy. Marine grew driven by offshore and shipping. Service grew in Energy and Marine.

India, Middle East and Africa

The order intake in the region was at the same level as last year. Energy grew driven by oil & gas and organic chemicals. Food & Water noted robust underlying demand in ethanol, starch & sugar and prepared food & beverage. Marine noted a weaker demand in oil & gas. Service grew in Marine.

Order intake for the 10 largest markets

Owners and shares

Owners and legal structure

Alfa Laval AB (publ) is the parent company of the Alfa Laval Group. The company had 55,551 (54,333) shareholders on June 30, 2024. The largest owner is Winder Holding AG, Switzerland, who owns 29.5 (29.5) percent. Next to the largest owner, there are nine institutional investors with ownership in the range of 7.4 to 1.5 percent. These ten largest shareholders owned 63.1 (61.5) percent of the shares.

Acquisitions of businesses

On March 14, 2024, Alfa Laval acquired the remaining 10.3 percent of StormGeo's subsidiary Climatempo in Brazil from the minority owners. Alfa Laval's ownership thereby increased from 89.7 percent to 100 percent. The transaction is reported as a change within the equity.

Risks and other

Material factors of risk and uncertainty

The main factors of risk and uncertainty facing the Group concern the business cycle, the consequences of Russia's war on Ukraine and other geo-political tensions, the price development of metals, inflationary pressures, the interest rate development and volatile fluctuations in major currencies. It is the company's opinion that the description of risks made in the Annual Report for 2023 is still correct.

Russia's war on Ukraine

The ongoing conflict has resulted in that Alfa Laval has ceased all commercial activities in Russia. Alfa Laval's assessment is that the longer-term implications of the war are of such a magnitude that the company in the fourth quarter 2022 provided for the entire closure of operations.

Sanctions

The current geopolitical environment has resulted in several sanction packages imposed on several countries where conflicts are ongoing. Alfa Laval follows and enforces all sanction imposed by the European Union as well as all US and other sanctions that are applicable. The significantly increased amount of sanctioned entities together with the sophisticated circumvention attempts, make the assurance work more demanding.

Asbestos-related lawsuits

The Alfa Laval Group was as of June 30, 2024 named as a codefendant in a total of 401 asbestos-related lawsuits with a total of approximately 401 plaintiffs. Alfa Laval strongly believes the claims against the Group are without merit and intends to vigorously contest each lawsuit.

Based on current information and Alfa Laval's understanding of these lawsuits, Alfa Laval continues to believe that these lawsuits will not have a material adverse effect on the Group's financial condition or results of operation.

Accounting principles

The interim report for the second quarter 2024 is prepared in accordance with IAS 34 Interim Financial Reporting and the Swedish Annual Accounts Act. The accounting principles are according to IFRS (International Financial Reporting Standards) as adopted by the European Union. In the report, alternative performance measures are used. See the Annual Report 2023 for definitions. Alfa Laval follows the Guidelines on Alternative Performance Measures issued by ESMA (European Securities and Markets Authority).

"Q2" and "Second quarter" refer to the period April 1 to June 30. "Jan-Jun" and "First six months" refer to the period January 1 to June 30. "Jan-Dec" and "Full year" refers to the period January 1 to December 31. "Last 12 months" refers to the period July 1, 2023 to June 30, 2024. "The corresponding period last year" refers to the second quarter 2023.

"Currency effects" only relate to translation effects, whereas "foreign exchange effects" also relate to transactional effects. "Mix" in the operating income bridge also includes a price effect. Comparison distortion items are reported in the comprehensive income statement on each concerned line but are specified on page 4 (when applicable).

The totals in the tables and calculations do not always add up due to rounding differences on individual lines. Meaning each subtotal or line figure corresponds with its original source and rounding, which can result in differences with reported totals which aggregate the exact figures before rounding.

The accounting and valuation principles of the parent company comply with the Swedish Annual Accounts Act and the recommendation RFR 2 Accounting for legal entities issued by the Council for Financial Reporting in Sweden. The Q2 2024 report has not been subject to review by the company's auditors.

The interim report has been issued at CEST 07.30 on July 23, 2024 by the Board of Directors and the President and CEO.

The Board of Directors and the President and CEO assure that the report for the first six months gives a true and fair view of the operations, financial position and results for the company and the consolidated Group and describes material factors of risk and uncertainty facing the company and the companies that are part of the Group.

Lund, July 23, 2024,

President and CEO
