**Approved ME-filter for MAN B&W ME-engines**

The filter elements of the Alfa Laval Moatti xxxDMxxHR ME-filter have been successfully tested at IFTS and fulfills the requirements mentioned in MAN Energy Solutions Quality Specification 0744631-6.3.

It is now also possible for licensees to select Alfa Laval Moatti at '1191 Hydraulic System Filter' in the Design Specification Order system (DSO).

This means MAN Energy Solution will create installation and pipe drawings of the ME-filter arrangement when receiving a firm order.

Best regards,  
Kasper Sønderskov Klint  
Jens Nørby Hansen
