

Training Session – Refinery Process Equipment

High efficiency heat exchangers in refinery processes

Location: Irving Oil Refinery, Canada

Session date: 2018-01-29

Presenter: Chris Wajciechowski, Alfa Laval

We're bringing our refinery equipment training session to you. Chris Wajciechowski is an Alfa Laval expert in refinery process and efficient heat exchangers. He will present topics related to high-efficiency heat exchanger technology and refinery issues:

- o Crude preheat trains
- o FCC
- o Hydrotreating/hydrocracking
- o Isomerization and Alkylation
- o Asphalt
- o Treating processes like amine, wet gas scrubbing, sour water,
- o case studies

Email Chris (chris.Wajciechowski@alfalaval.com) with suggestion for topics. We will do our best to customize the engineering sessions to your request!

August 28th 8:30AM at the Irving Oil Refinery

Version: 1

Release Date:
2019.08.28
