

Alfa Laval PureSOx Exchange Programme

Cost-efficient sensor replacement to ensure compliance

To secure emissions compliance, your Alfa Laval PureSOx system needs accurate measurements from its PAH and turbidity sensors*. These sensors must be factory calibrated every two years, which can be handled simply and conveniently through our Exchange Programme.

What we do

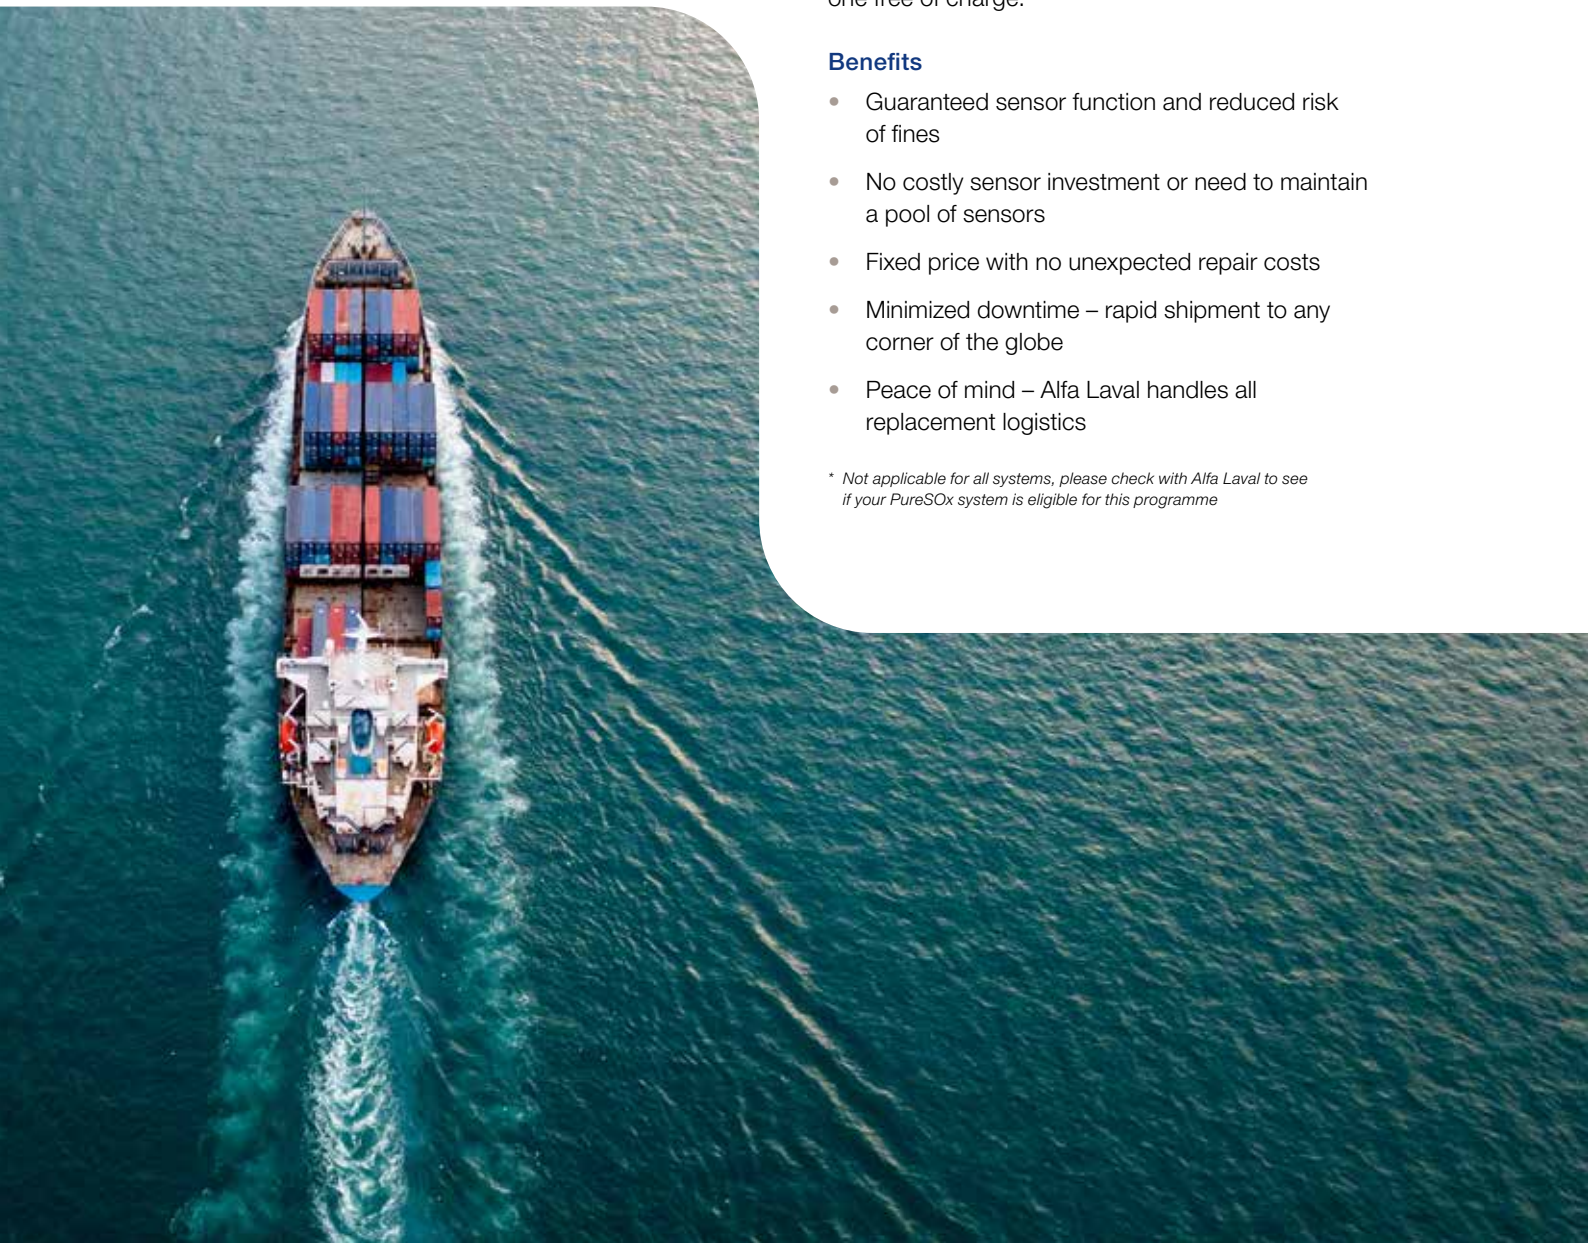

Alfa Laval guarantees that your PureSOx system always has functional and accurate PAH and turbidity sensors, so that you can prove your compliance and avoid fines. When the sensors require factory service after two years, we swap them out with replacements calibrated to MEPC specifications.

The Exchange Programme includes a full warranty. If a properly maintained sensor fails before regular service is required, we will send you a serviceable one free of charge.

Benefits

- Guaranteed sensor function and reduced risk of fines
- No costly sensor investment or need to maintain a pool of sensors
- Fixed price with no unexpected repair costs
- Minimized downtime – rapid shipment to any corner of the globe
- Peace of mind – Alfa Laval handles all replacement logistics

* Not applicable for all systems, please check with Alfa Laval to see if your PureSOx system is eligible for this programme

Scope of service

The Exchange Programme for PureSOx includes the following during a six-year period*:

- **Guaranteed on-time replacements**
We provide replacement PAH and turbidity sensors every two years, in time for your existing sensors' required calibration. The replacement sensors have been factory inspected, maintained, cleaned and calibrated.
- **Full warranty**
After a sensor exchange the warranty of the sensors is extended by 24 months.
- **Complete replacement logistics**
Alfa Laval acts as your partner, managing all scheduling and replacement logistics. Replacement sensors are available in any major port within three days.

* Not applicable for all systems, please check with Alfa Laval to see if your PureSOx system is eligible for this programme

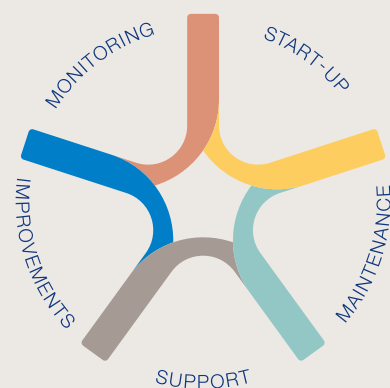

Scope of supply

The Exchange Programme is limited to replacements for PAH and turbidity sensors. It is available for all Alfa Laval PureSOx systems, regardless of configuration.
